# Choose Us

## Superior Quality Control

Constructed in a controlled environment with frequent quality inspections to ensure precision.

## Cost-Effective

Minimizes the potential for building framing cost overruns, and reduces on-site labor and associated costs.

5-storey, 97-unit apartment building in Charlottetown, PEI

## Early Issue Detection

Framing issues are resolved on paper during the design and review phases, instead of during construction - preventing costly delays.

## Construction Schedule

Mitigates weather-related delays, and streamlines projects timelines by allowing framing to start ahead of schedule.

## Enhanced Job Site Safety

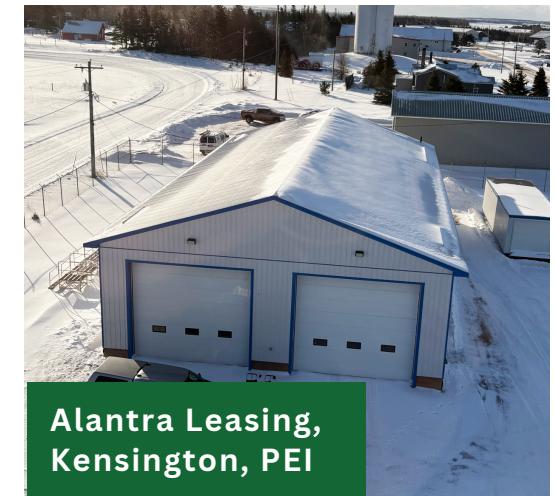

Promotes a secure work environment.
